

Indian Palms HOA

TURF

Mowing – Mowing height will remain the same until the over-seeding process begins.

Fertilization – No fertilization is scheduled for the month of August.

Herbicide – Monument application to treat for nutsedge will be completed in August.

SHRUBS

Focus Pruning – Normal maintenance pruning will be our focus and the avoidance of pruning heat sensitive shrubs.

Plant Replacement – Plant replacements will be done on a per work order basis with managers approval.

TREES

Scheduled Trimming – Palm pruning was completed in July. No pruning scheduled or August.

AUGUST 2019 HIGHLIGHTS

The extreme heat of summer continues through the month of August. Conditions will continue to be unfavorable for plant material and landscape workers.

Adequate irrigation will be critical and must be monitored daily.

Shrub pruning should be minimal. Major pruning should be put off until September if possible. Planting should also be deferred until next month.

Flowers and shrubs should be monitored for pests and treated as necessary.

Turf areas where the Bermuda has not filled in should be fertilized to optimize growth. Herbicides should be applied to control nut sedge and broadleaf weeds.

Plans should be made for planting projects in the coming months.
