

San Lorenzo Community Stucco & Weep Screed Repairs

We have received directions and approved set of plans from the City of Yorba Linda for the work required to complete the repairs in process at your home **Phases 3 and 4 only**, see attached map of affected areas. *Please be patient as to all other areas in the community.*

Before any work can commence, Reconstruction Experts will be conducting field observation to determine the scope of work required by the city to complete the work in progress.

During the week of 08/26 through 08/30 Reconstruction Experts field personnel will be in the community making notes and taking pictures to document the work required for your home. The team will be wearing RE green safety vests so that they are easily identified.

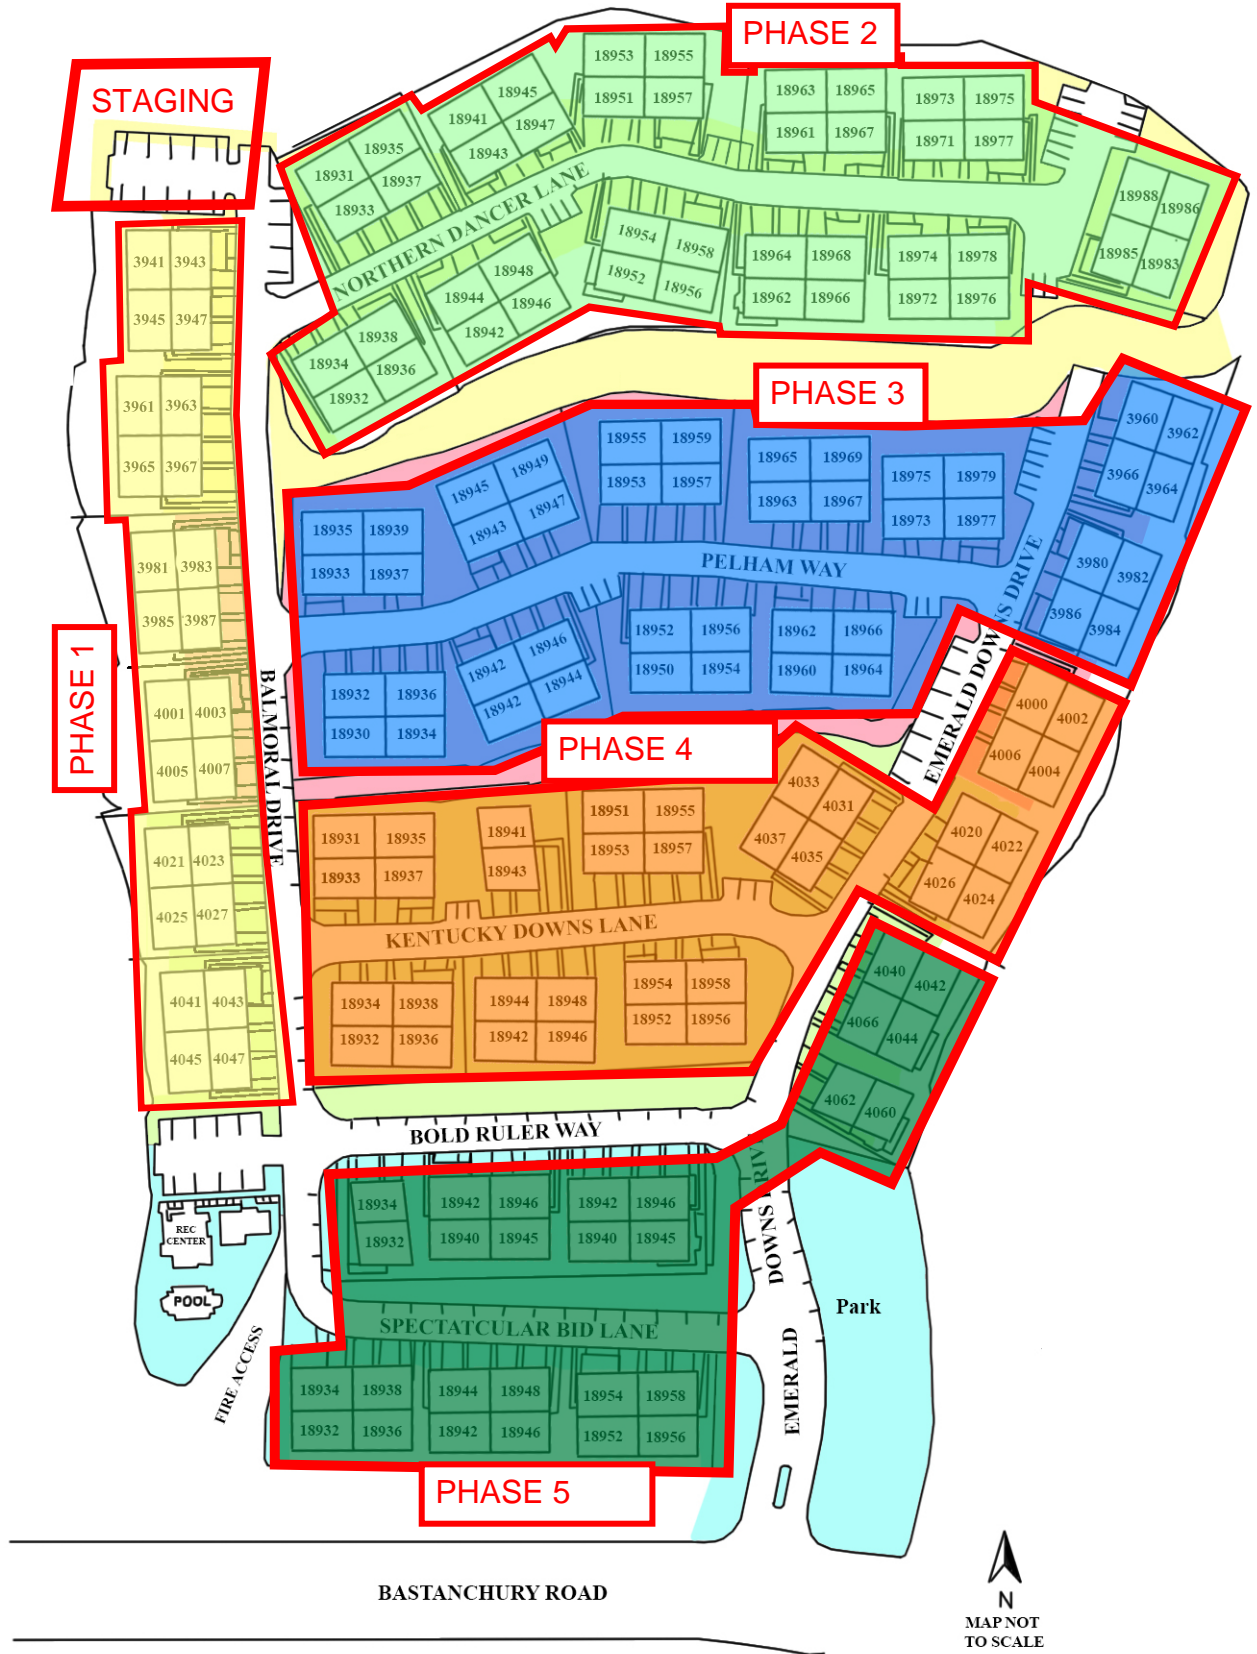

You are not required to be home during this time. However, if you have open areas of stucco in your backyards, you **must** please contact us at the information listed below so we may schedule access to the area to observe and document. If you will not be home, we kindly request that any pets be secured or kept inside. The process should only take 15 -20 minutes for reports.

We look forward to continuing and completing the work in progress.

Please let us know if you have any questions or Stonecastle Community Management team.
