

# VILLAS DE LAS FLORES

## AUGUST 2024

### FLOWERS

**Maintenance** – No maintenance is scheduled this month.

### TURF

**Mowing** – Mowing will be completed at the height of 1”in.

\*Concentrate on weak areas of turf to get them to fill in by the end of the month. Continue to treat areas with nutsedge. Expect shady areas to continue to decline.

**Fertilization** – There is no fertilization scheduled this month.

**Herbicide** – Spot spraying will be completed for Nutsedge on the turf and desert landscape.

### SHRUBS

**Focus pruning** – Any dead material will be removed; no heavy pruning will be done until temperatures decrease to avoid damage to plants.

\*Limit heavy pruning on shrubs. Do not remove sun damaged foliage at this time to prevent further damage.

**Plant Replacement** – No plant replacements will be completed this month.

### TREES

**Scheduled Trimming** – There is no tree trimming scheduled.

### HIGHLIGHTS

**Notes:** The severe high temperatures continue through the month of August. Landscape plant material and landscape workers are both adversely affected by the heat.
