

TURF

Mowing: Weekly mowing will continue during this month at 1".

Fertilizer: None since turf is not overseeded. Bermuda grass will go into dormancy in the next couple weeks.

Herbicide: None scheduled, but if needed, a request will be submitted.

SHRUBS

Focus Pruning: Lantanas, Tecomas, Xylosmas, bougainvillea, Russelias, hedges, and vines.

Replacements: The replacement list was created last month. If approved, new plants will be installed this month. We anticipate finish planting by mid-November depending on approval.

General: Now is still a good time for any heavy pruning before the weather gets colder next month. This is still a good time for all types of new planting projects.

TREES

Scheduled Pruning: None scheduled this month.

HIGHLIGHTS

Notes: November continues with ideal temperatures for landscapes. November is usually a good month for most landscape projects.
