

TURF

Mowing: The turf will continue to be maintained at a height of 1.5 inches.

Fertilizer: Granular fertilizer will be applied depending on weather. Bermuda turf still in dormancy period.

Herbicide: Any necessary applications will be communicated to management in advance for approval.

General: Turf will be growing vigorously. Manage fertility to prevent excessive growth. Watch for hot spots and correct irrigation deficiencies.

SHRUBS

Focus Pruning: Most vines, bougainvillea, Texas rangers, lantanas, Tecomas, and Xylosmas.

Replacements: There are no plant replacements scheduled.

General: Shrubs will be growing vigorously. Prune to control growth. Consider use of plant growth regulators at this time. This is an ideal time for new plantings.

TREES

Scheduled Pruning: Not scheduled this month.

HIGHLIGHTS

Notes: It's March in the desert and spring planting season is here. Expect rapid growth in turf and plants in the landscape. Temperatures will be rising as the month progresses.
